OPTIMIZING MSME SALES PERFORMANCE: WEB-BASED DATA VISUALIZATION AND BUSINESS PREDICTION PLATFORM

COVI
COME VISUALIZATIONS

Desember 2024

BUSINESS OVERVIEW

covi is a designed platform to help MSME in analyze automated data, user-friendly interface, and data-driven recommendations.

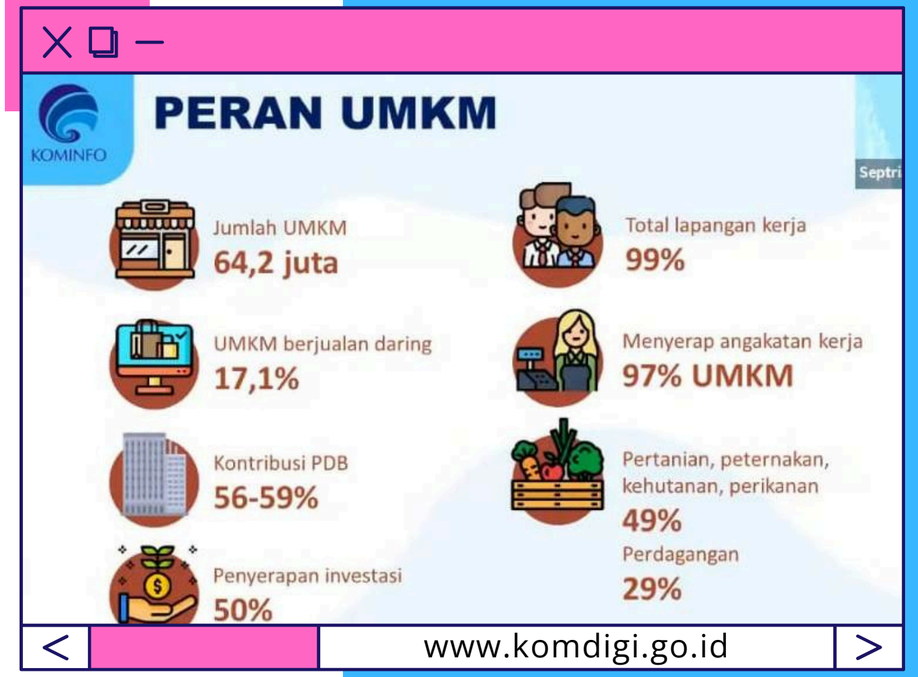

This platform helps MSME understand sales trends and make better decisions.

PROBLEM

Micro, Small, and Medium Enterprises (MSME) plays a strategic role in the Indonesian economy, but often faces various challenges that hinder their growth. One of the main problems faced is the lack of ability to manage and analyze sales data. Many MSMEs still relies on traditional methods in running their businesses, such as manual recording, making it difficult to gain in-depth insights into sales performance, consumption patterns, or market trends.

SOLUTION

Our solution is a web platform that helps MSME analyze business data easily and efficiently and provides consulting services. This platform helps strategic decision making such as understanding market trends and business performance while providing in-depth explanations through consultation.

KEY FEATURES

DATA VISUALIZATION

It is designed to turn complex numbers into easy-to-understand interactive charts. In one intuitive dashboard, users can monitor business performance through line, bar, or pie charts, and explore relevant sales patterns and trends.

FEATURED FEATURES

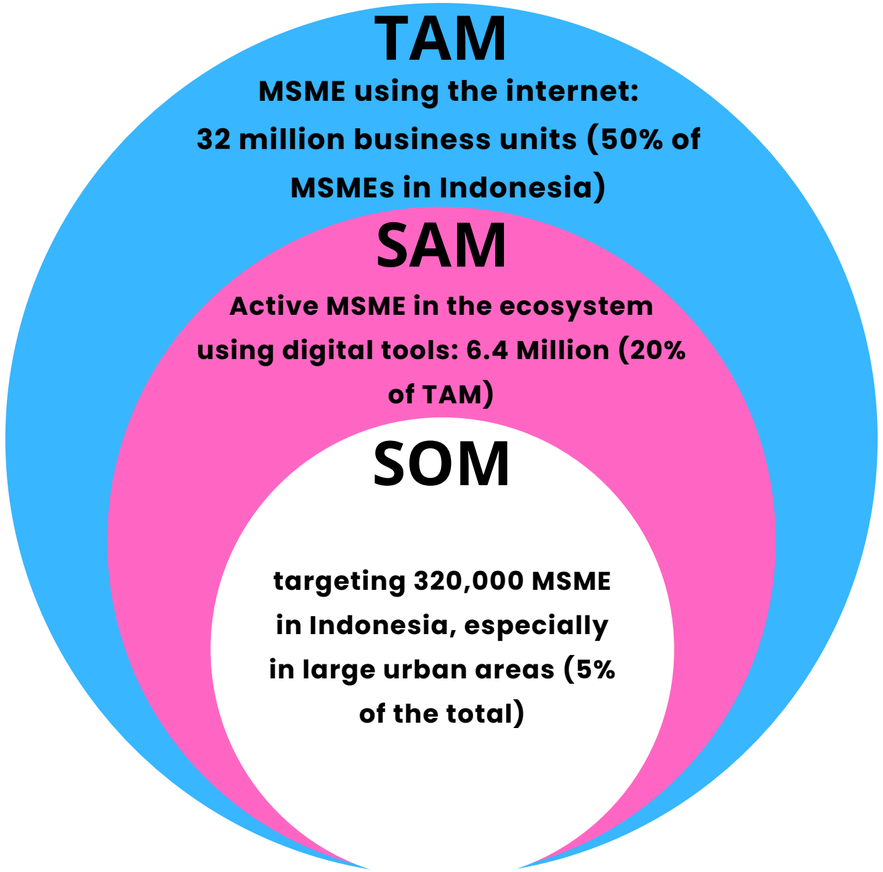

Machine Learning-Based Sales Forecasting

presents accurate sales projections based on historical data. And planning a more mature business strategy based on data can make entrepreneurs more confident in making decisions.

MARKET SIZE

The following are user targets created based on demographic, geographic, psychographic, and behavioral categories.

DEMOGRAPHIC

MSME owners: Age 20-40 years, male and female gender.

GEOGRAPHIC

MSME owners: Living in urban and semi-urban areas with stable internet access.

USER

PSYCHOGRAPHIC

MSME owners: Open to new technologies, and tend to seek data-driven solutions.

BEHAVIORAL

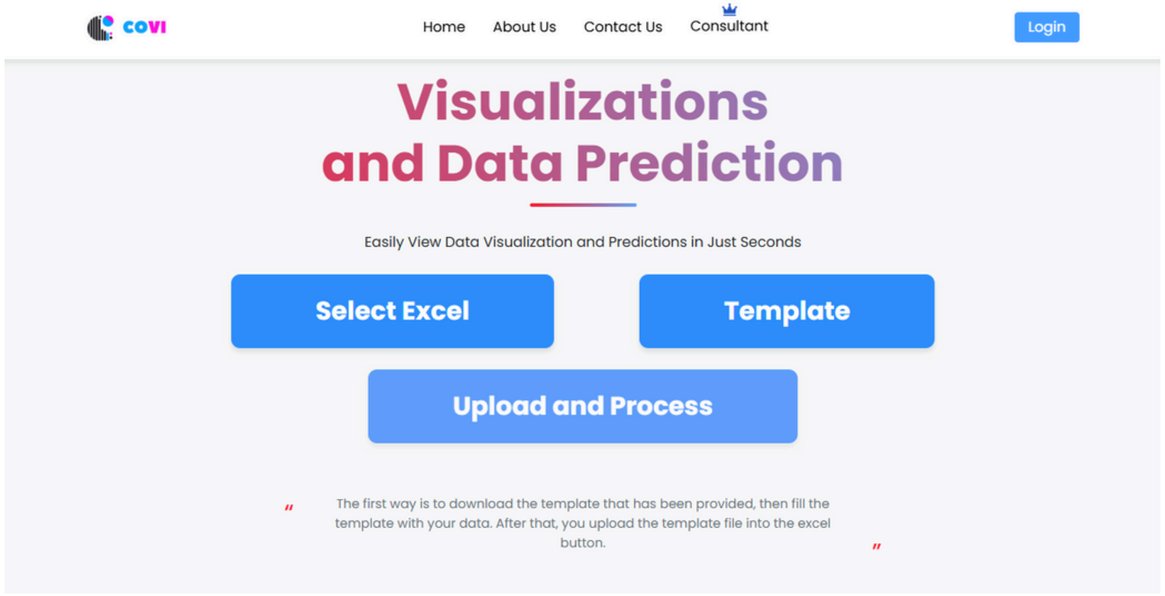

MSME owners: Looking for ways to improve operational efficiency, and understand sales patterns.

MODEL AND EVALUATION RESULT

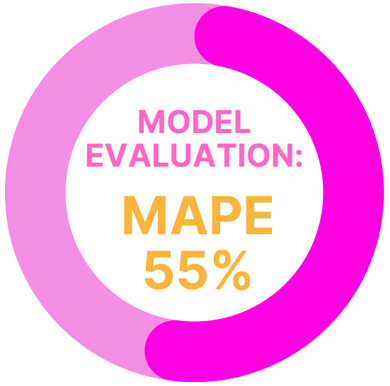

Come Vizualitation

Testing using the ARIMA (AutoRegressive Integrated Moving Average) algorithm, which is effective in predicting time series data with seasonal patterns or trends. The model is selected based on the smallest AIC value and parameter significance test.

```
Performing stepwise search to minimize aic
 ARIMA(2,0,2)(0,0,0)[0]             : AIC=6227.443, Time=1.50 sec
 ARIMA(0,0,0)(0,0,0)[0]             : AIC=6487.646, Time=0.04 sec
 ARIMA(1,0,0)(0,0,0)[0]             : AIC=6298.128, Time=0.06 sec
 ARIMA(0,0,1)(0,0,0)[0]             : AIC=6408.999, Time=0.05 sec
 ARIMA(1,0,2)(0,0,0)[0]             : AIC=6226.517, Time=0.39 sec
 ARIMA(0,0,2)(0,0,0)[0]             : AIC=6389.119, Time=0.20 sec
 ARIMA(1,0,1)(0,0,0)[0]             : AIC=6225.144, Time=0.21 sec
 ARIMA(2,0,1)(0,0,0)[0]             : AIC=6227.021, Time=3.19 sec
 ARIMA(2,0,0)(0,0,0)[0]             : AIC=6263.466, Time=0.56 sec
 ARIMA(1,0,1)(0,0,0)[0] intercept   : AIC=6241.266, Time=1.13 sec

Best model:  ARIMA(1,0,1)(0,0,0)[0]

===================================================================================
```

To evaluate the performance of the ARIMA model in prediction, the Mean Absolute Percentage Error (MAPE) is used. MAPE measures the level of prediction error by comparing the actual value and the predicted value in percentage form.

SWOT & BMC

S — STRENGTHS

- Easy-to-access platform
- helps MSMEs make decisions

interactive interface is easy to understand.

W — WEAKNESSES

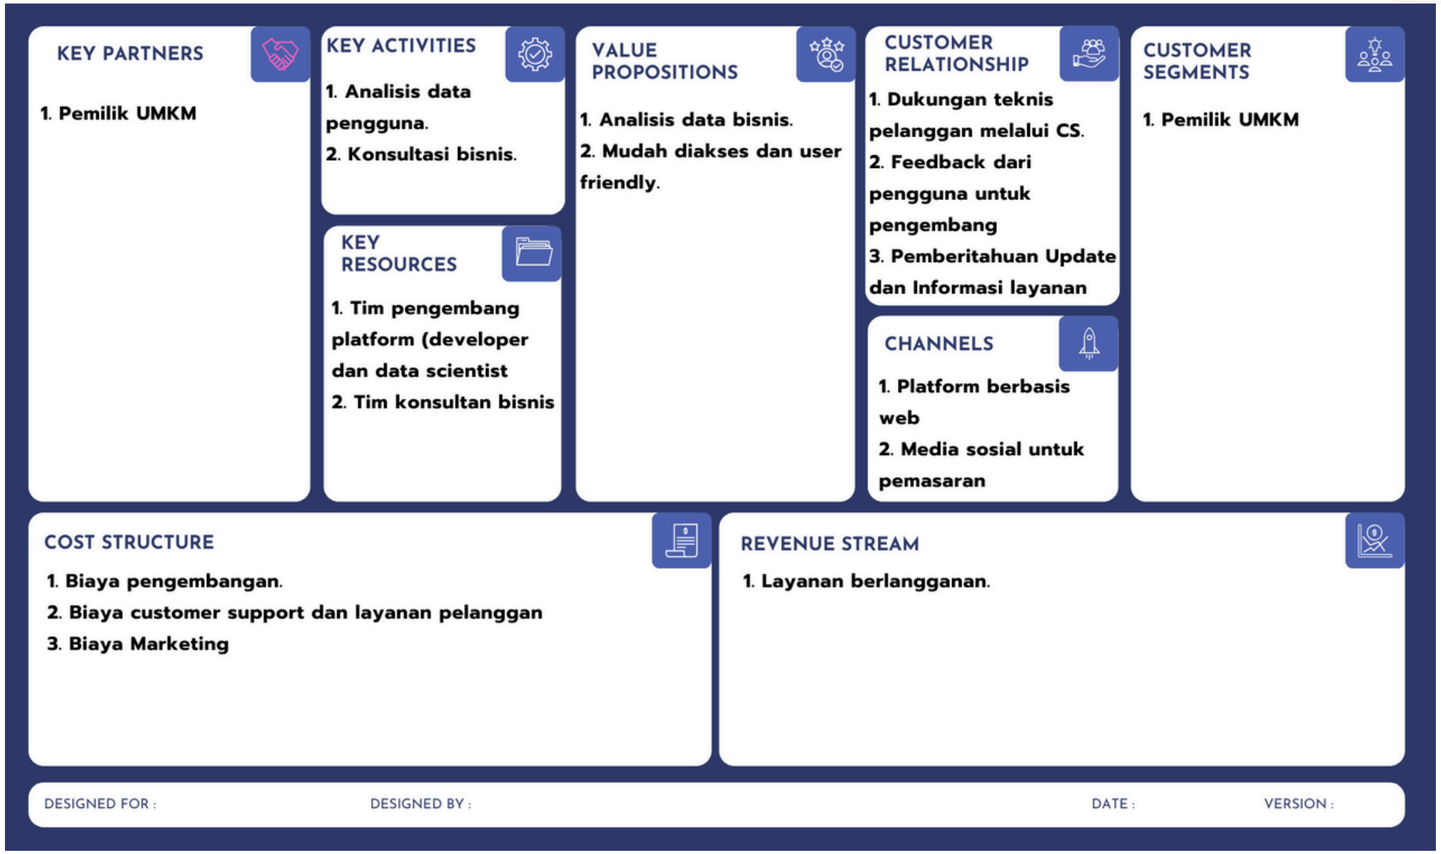

- Only supports data input in excel format.
- Low digital literacy of users limits the platform
- Cannot guarantee the accuracy of data entered by users

O — OPPORTUNITIES

- Educating MSMEs about the importance of data for decision making
- collaborating with business consultants to support MSME strategies

T — THREATS

The threat of data leaks can damage the platform's reputation and reduce user trust.

TESTING BMC

Test Card — Strategyzer

Validation of Problems Faced by MSMEs

Deadline

Assigned to

Duration

STEP 1: HYPOTHESIS

We believe that

MSMEs have difficulty analyzing sales data due to limited knowledge of analysis tools and inefficient manual methods.

Critical:

STEP 2: TEST

To verify that, we will

Conduct a survey or interview with 20-30 MSME actors to understand their difficulties in analyzing business data and consumption patterns.

Easy to Measure: Desirability:

STEP 3: METRIC

And measure

Percentage of respondents who stated that they face difficulties in data analysis and the potential for increased efficiency through digital-based solutions.

Time Required:

STEP 4: CRITERIA

We are right if

More than 70% of respondents confirmed that they need a platform like COVI to simplify data analysis and improve decision-making.

Validate Interest in Key Features

Deadline

Assigned to

Duration

STEP 1: HYPOTHESIS

We believe that

Simple data visualization features and AI-based predictions are a primary need for MSMEs to understand sales trends.

Critical:

STEP 2: TEST

To verify that, we will

Testing the COVI prototype with 20-30 MSMEs and asking them to evaluate features such as data visualization dashboards and AI predictions.

Easy to Measure: Desirability:

STEP 3: METRIC

And measure

Ease of use scores and level of satisfaction with features (scale 1-10), as well as level of preference for certain features.

Time Required:

STEP 4: CRITERIA

We are right if

Over 80% of users gave a score of >7 for ease of use and relevance of data visualization and sales prediction features.

Validation of Pricing Model Effectiveness

Deadline

Assigned to

Duration

STEP 1: HYPOTHESIS

We believe that

The free pricing scheme for basic features and premium starting at IDR 100,000/month will attract MSMEs to use this platform.

Critical:

STEP 2: TEST

To verify that, we will

Conducting market simulations by offering a trial of the platform to 30 MSMEs and evaluating their response to the pricing scheme.

Easy to Measure: Desirability:

STEP 3: METRIC

And measure

Conversion rate from free users to premium users (minimum 20% of trial participants).

Time Required:

STEP 4: CRITERIA

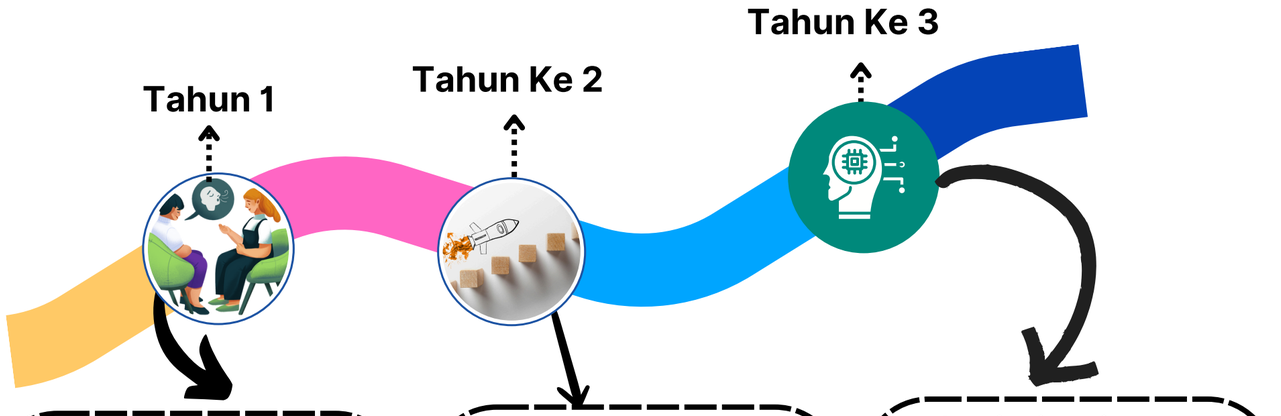

We are right if

At least 30% of MSMEs stated that the price was affordable and in accordance with the value provided by the platform.

GO-TO-MARKET STRATEGY

User Introduction and Acceptance
focus on building awareness about the platform among MSMEs through engaging digital campaigns and live workshop events.

Growth and Expansion
increased functionality by launching more advanced AI-based prediction features.

Optimization and Scalability
We will introduce a mobile application to facilitate user access and expand our reach to the international market.

STRATEGY

Target Market Identification	• Main focus on MSME owners in urban and semi-urban areas with stable internet access. • Prioritizing MSMEs in the retail, food & beverage, and small service sectors with limited operational scale.
Channel Strategy	**Digital Marketing:** • Social media campaigns through Instagram, Facebook, and LinkedIn. • Search-based advertising (Google Ads) to reach business owners looking for data analytics solutions. **Offline Events:** • Free workshops or training to introduce the platform. • Collaboration with local MSME communities for product demos.
Customer Acquisition Tactics	• Free offering for data visualization as a gateway, with a premium option for AI-based predictions. • Discounts or promotions for first-year signups. • Referral Program: Incentivizes users who successfully invite other MSMEs to join.

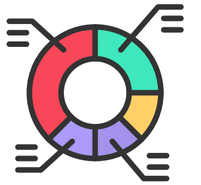

COMPETITIVE ANALYSYS

Come Vizualitation

	COVI	POWER BI	TABLEU	Qlik sense
Product	Web-based platform for MSME data visualization and AI-based predictions	Integrated data visualization solution with Microsoft	Feature-rich visual data analytics platform	Data analysis solution with high interactive features
Service	Provides AI-based data visualization and automated sales predictions	Integration with the Microsoft 365 ecosystem	Deep visualization with predictive analytics	In-depth analysis features for large companies
Price	Free for data visualization features and premium starting from IDR 100,000/month for sales predictions	Rp160,000/month for the pro version	Starting from Rp1,050,000/month for full license	Starting from Rp1,400,000/month
Quality	AI based system with high prediction accuracy	Suitable for companies already using Microsoft	Known for its superior graphics and diverse dashboards	Suitable for analysis of large data volumes
Feature 1	Simple and informative MSME data visualization	Template-based interactive graphic visualization	Very flexible for big data, but takes time to learn	Focus on interactive analytics for enterprises
Feature 2	AI based predictions	No prediction feature	Simple prediction feature, but requires manual configuration	Have AI based Prediction In real time
